Continued Activity of the Insurgents.

Guerrilla Warfare on a Larger Scale Being Planned.

JA P. NIGHT REPORT.)

MANILA. March 3, 9:55 p.m.—[By Manila Cable.] Reports reach the Associated Press from various sources, neluding army officers and the heads of commercial houses with agents hroughout the islands, of continued efficient armong the insurants who aroughout the mands of continued activity among the insurgents, who are endeavoring to keep alive the armed opposition to the United States and are planning to continue the in-nurrection with guerrilla warfare on a larger scale when the rainy season

here and released on promises to re-frain from agitation.

While many of the insurgent munici-pal officers were continued in office on taking the oath of allegiance, resi-dents who are acquainted with them aking the oath of allegiance, residents who are acquainted with them have little faith in their adherence to their promises. Citizens of Tariac, capital of the province of that name, numbering eleven persons, have been arrested, and charged with plotting, and two insurgents have been captured at Malabon with incriminating papers and \$4000 collected from the natives. Some of the municipal governments appear loyal and efficient. On the other hand, one American general declares he believes that the majority in his province are agents of the insurrection.

declares he believes that the majority in his province are agents of the insurrection.

A fresh issue of insurgent pamphiets is being circulated, asserting that the American promises of good government are merely a mask for commercial exploitation of the Philippines, quoting Senator Beveridge's speech, and an editorial from a Washington newspaper, headed "Let Us Be Honest."

The trial of the guerrilla charged with murder, is finished, and it is believed the commission's verdict will be guilty. Indictments against others have been prepared.

No report has been received from Gen. Bates's expedition. He has probably moved inland, where communication with him is impracticable.

The army throughout the island of Luson is working hard, securing the country for insurgents, and killing a few daily. The section from Manila to Dagupan has been thoroughly cleared, the secuting parties being unable to find any insurgents. Gen. Funston and Col. Keenan took 200 men through the mountains to Baler, on the eastern coast, without meeting an insurgent. But they are active along the northern coast from Dagupan to Aparri. Occasional reports come of an American solder being killed or disappearing. In the southern provinces the insurgents continue to harass the American garrisons by night demonstrations.

PHILIPPINE COMMERCE.

PHILIPPINE COMMERCE. MOST OF IT WITH EUROPE.

WASHINGTON, March 3.—The War WASHINGTON, March 3.—The War Department has published some sta-tistics of Philippine commerce for the quarter of last year ending September 30, which throw new light on the ex-port trade, so far as it relates to the United States. It is shown that of the Cyal experts of raw sugar amounting total exports of raw sugar amounting to \$1,143,349, only \$85,052 went to the United States, while Japan and Great Britain took nearly all of the re-

mainder.
Also, as to leaf tobacco, the exports of which were valued at \$355,463, the exports to the United States were trifling in amount, Spain taking the largest share, \$224,818, and England \$35,947.

\$38.947.
The United States also took only \$5032 of Manila cigars out of a total export of \$730.299, and none of the other manufactures of tobseco came to the United States. In fact, cigars and cigarettes to the amount of \$7760 were imported from the United States.

Even in Manila hemp, the United States was second to Great Britain, taking \$905,815 worth, while Great Britain took \$1,147,424. The total value of the

(A P. DAY REPORT.)

WASHINGTON. March 3.—Sensational charges are contained in an anonymous letter which has been received at the Navy Department from Manila. The communication relates to the wrecking of the Charleston, and makes the serious statement that a number of the officers of the vessel, at the time of the disaster, were under the influence of liquor. The correspondent who furnishes the information claims to have verified the allegations by diligent inquiry among the gations by diligent inquiry among the officers of the Charleston. The letter was not placed on the official files on account of the peculiar nature of the charges, but it has been referred to the Judge-Advocate-General of the Navy. with instructions from Secretary Long that the matter be investigated at once. This inquiry will probably not take a more formidable aspect than a note of inquiry, addressed to the commander-in-chief of the Asiatia istation.

Naval officers here who have seen the letter say there was nothing to justify the charges, and they believe the department's inquiry will relieve the accused officers from the unwarranted allegations.

Capt. Pigman, who commanded the Charleston at the time of the wreck, is not involved in any of the charges.

MEAT FOR SOLDIERS.

FROZEN ARTICLE IS GOOD, (A. P. EARLY A.M. REPORT.) WASHINGTON, March 3.—Acting Commissary-General Weston is in re-ceipt of reports from Manila speaking in the highest terms of the present arrangements in use to supply the army with fresh meats. It is said that the meats which are brought out from the United States or Australia by the naval supply ship Glacier, or taken from the Australian merchant steamers, have Australian merchant steamers, nave been kept as long as seven months in perfect condition. The reports declare that after witnessing the native methods of slaughtering animals, and the stock, there can be no doubt as to the great superiority of the frozen meats brought by the naval vessels for the army in the Philippines.

great lady of the German court, formerly maid of honor to Empress Frederick, is authority for the statement that the Queen is the only person in Europe of whom the Emperor stands in awe. She alone addresses him as Willie and is most affectionate in her treatment of him as her favorite grandson. Powerful as these influences may be regarded at Potsdam, it is probable that the German Emperor has received substantial concessions from the British Foreign Office, which fully accounts for his neutrality during the present campaign and his hearty friendship for England.

There is a sudden shrinkage in news from the seat of war. Supplies are moving rapidly into Ladysmith, and Buller's army is resting from its labors until orders can be received from Roberts respecting future operations. Pathetic accounts of White's emotion when Dundonald's troopers arrived in Ladysmith still apear in print. The railway to Colenso will require extensive repairs. Three British officers belonging to White's and Buller's forces have escaped from Pretoria and ten soldiers have also cluded pursuit. Colesberg district has been entirely abandoned by the Boers, and Clement's scouts are now near Orange River. Gatacre's forces are moving toward Stormberg, and there has been a renewal of skirmlshing near Dordrecht. Fighting is reported to be imminent in the Free State on the line of Roberts's advance, but the extent of the Dutch concentration is unknown. Dutch concentration is unknown.

The War Office intimated at midnight that there was no prospect of news until something definite shall have been done. This is quite in keeping with the complete silence which Lord Rob-erts has hitherto observed while his plans were in progress of accomplish-ment, and until he is in actual grip with the Boers it is probable that the public will hear little or nothing of his doings.

Cronje was at the mercy of Lord Roberts at Paardeberg. The advance in Matai was then only postponed to allow time for the big guns and ammunition and stores to be safety removed north and west. That the Boers were not completely successful in carrying out this intention, was owing to the fact that they were more or less demoralised by Gen. Buller's victorious attack Tuesday. After the battle orders were evidently given for a hasty retreat to the passes, with the result that large quantities of amunition and two guns were left behind. Virtually speaking. Natal is now clear of the Republican forces. Public interest in the war is already declining since the end is considered a foregone conclusion, tedious as may be the process by which it will be reached. The relief of two garrisons and the complete collapse of the Dutch pan of campaign leave Gen. Roberts at liberty to concentrate his forces, with transportation the chief difficulty to be overcome.

Lord Salisbury Opposed to Any Sort of an Anglo-American Alliance. Friction Between the Colonial Of-fice and Other Departments of Goverament le Acute.

(A. P. NIGHT REPORT.)

LONDON, March 3.—(By Atlantic Cable. Copyright, 1900, by the Associated Press.) With the triumph of the British arms the bogey of continental interference has passed into seclusion, and now a new and more curious, and to Americans more interesting, phase comes over the fascinating web of international relations as portrayed through the press. This consists of suppositions regarding the attitude of the American Congress, toward Great Britain, the possibility of its recommending intervention, voting sympathy with the Boers, refusing to ratify the Nicaraguan treaty, and, lastly, but chiefly, refusing to consider the Canadian contentions in a spirit of friendliness. The great public interest in all this is mainly the result of many special cable dispatches from English correspondents, stating that the administration is being severely attacked for alleged friendliness toward Great Britain, and in view of the coming election, might be forced to make a sort of an anti-British demonstration in order to offset such accusations as that of forming an alliance. To cap this climax comes a streamous appeal in the Times today that Lord Pauncefote, the British Ambassador at Washington, should be retained at any rate until the elec-

NEW YORK. March 2.—The New York Financier says this week:

"A decrease of \$5,037,000 in the surplus reserve of the clearinghouse banks of New York City for the current week, has reduced the excess cash holdings to \$13,641,550, a shrinkage of more than \$17,00,000 in one month. The feature of the statement is the continued rise in loans. The increase for the week in that item has been \$3,621,000. One month ago the total was \$55,000,000, lower than now reported. This exceeds last year's record very materially, although the incentive which brought about the 1899 expansion is lacking now. The explanation for the rapid increase in loan commitments lies in the heavy volume of commercial business which the country is doing. Lately there has appeared another factor—the absorption of government bonds by banks—and this accounts in part for the continued addition to the loan item. The banks are still losing cash to the treasury. The increase of \$3,050,000 in deposits was much below the average expansion over the past few weeks, and requirements for additional reserve were not as heavy as has been the case from week to week since the beginning of February. As it is the lessened excess reserve for the past six digys is due almost the deposit increase being responsible for only three-quarters of a million of the total. Viewed as a whole, the exhibit of the tanks is not as unfavorable as had been anticipated, but it certainly favors the prediction that money rates are now about as low as they will be for some weeks to come. The money market in the immediate future will be governed largely by the amount which the banks will lose to the treasury, and the passage of the Refunding Bill may also complicate matters temporarily. The banks are still adding to their circulation, and the total is now in excess of any amount reported during the last year."

NEW YORK March 3.—The Ohio Society of New York held its fourteenth annual dinner at the Waldorf-Astoria tonight. William McKinley, President of the United States, was the guest of honor. More than four hundred covers were laid. Before the banquet President McKinley held a reception and shook hands with the members of the society and the guests.

Among those at the President's table were Gov. Roosevelt, Gov. Nash. ex-Gov. Morton, C. N. Bliss, Senator Mark Hanna, Lieut.-Gov. Woodruff, Gen. Swayne, Gen. Corbin, H. Clay Evans, Gen. Thomas H. Hubbard, John Barrett, Tunis G. Bergen nad Julian T. Davies.

Gov. Rooseveit was late in arriving, and was loudly cheered as he came in at 3:30.

At 9 o'clock, Mrs. McKinley, wife of the President, accompanied by Mrs. Abner McKinley and Dr. Rizley of Washington, took seats in one of the boxes, Mrs. McKinley was loudly appiauded, and she bowed, the applause being renewed. All the galieries were filled with ladies, many calling on the President's wife.

Mrs. McKinley arose and bowed.

The toast, "The President," was drank standing.

President McKinley then arose amid tremendous applause. In the course of his speech he sald:

"It has been some years since I was your guest. Much has happened in the meantime. We have had our blessings and our burdens and still have both. We will soon have legislative assurance of the continuance of the gold standard with which we measure our exchange, and we have the open door in the Far East through which to market our products. We are neither in alliance nor antagonism nor entanglement with any foreign power, but on terms of amity and cordiality with all. We buy from all of them and sell to all of them, and our sales exceeded our purchases in the past two years by over one billion dollars. Markets have been increased and mortgages have been reduced. Interest has fallen and wages have advanced. The public debt is decreasing. The country is well-to-do. Its people for the most part are happy and contented. They have good times and are on good terms with the nations of the world. There are unfortunately those among us, few in number, I am sure, who seem to thrive best inder base in the past two years been reduced. Interest has fallen and wages have advanced. "After thirty-three years of unbroken peace came an unavoidable war. Happilly the conclusion was quickly reached, without a suspicion of unworthy motive of practice or purpose on our part, and with fadeless honor to our arms. I cannot forget the quick response of the people to the country's need, and the quarter of a million men who freely offered their lives for their country's service. It was an impressive spectacle of national strength. It demonstrated our mighty reserve power and taught us that large standing armies are unnecessary when every citizen is a "minute man," ready to join the ranks for the national defense.
"Out of these recent svents have come to the United States grave trials and responsibilities. As it was the nation's war, so are its results the nation's problem. Its solution rests upon us all. It is too serious to stiffe. It is too earnest for repose. No phrase or catch word can cancel the sacred oblication. No use of cpithet, no aspersion of motives by those who differ will contribute to that sober judgment so essential to right conclusions. No political outcry can abrogate our tiesty of peace with Spain, or absolve us from its solemn engagements. It is the people's question, and will be until its determination is written out in their enlightened verdict. We must choose between manly doing and base desertion. It will never be the latter. It must be soberly settled in justice and good conscience, and it will be. Righteousness which exalteth a nation must control in its solution. No great emergency has arisen in this nation's history and progress, which has not been met by the sovereign people with high capacity, with ample strength and with unflinching fidelity to every honorable obligation. Partisanship can hold few of us against solemn public duty. We have this so often demonstrated in the past, as to mark unerringly what it will be in the future. The national sentiment, and the naton's conscience were never stronger or higher than now. There has been a reunion of the people around the hol

TESTIMONY BEFORE THE HOUSE MILITARY COMMITTEE. MILITARY COMMITTEE.

[A. P. NIGHT REPORT.]

WASHINGTON, March 3.—Edward
Flanigan, of Mullen, Idaho., continued
his testimony before the House Committee on Military Affairs concerning
the Coeur d'Alene troubles. He said
notices were posted early last July
forbidding members of organized labor
from going to the miners' cemetery
July 11 for their annual ceremoy over
deceased miners. The order, witness

tatement that State Auditor Sincla

Chairman Huil brought out the statement that State Auditor Sinclair Bartlett signed the notice as a representative of Gov. Steuenberg, who, the witness said, represented the Democratic and silver parties. Notwithstanding the order a number of women secretly carried flowers to the miners' graves, but as there was no demonstration they were not arrested.

Mr. Flanigan explained the "permit" system put into effect after the military arrived. Under this system, he said, men could not go to work unless they got a permit from the State officials. The witness said permits to work were purchasable, He advanced \$2.50\$. to a friend who paid it to a deputy, and was put to work the next day. Letters to men in the "bull-pen," he said, were opened by the officials before delivery to the prisoners.

D. R. Heney, formerly a miner and now an owner of mining and other property, testified as to his experiences during the trouble. He had been appointed a Deputy Sheriff, and, seeking to preserve peace, ordered the saloons closed. The witness said he was arrested by one of the State deputies, accompanied by a squad of soldiers, and put in the "bull pen."

He said he could have given bail up to \$100,000, but was not allowed to do so. He detailed numerous instances of alleged prejudices in the proceedings before the Coroner, saying witnesses who testified against the accused miners were released, while those tavorable to them were held. A recess was then taken.

WASHINGTON, March 3. — Mr. WASHINGTON, March 3.— Mr. Heney said one of the men after being in a dark guardhouse for a week came out unable to use his eyes, and in the witness's opinion his eyesight was permanently injured. The men in the "pen," he said, were physically broken down after their long confinement. He lost twenty pounds during his stay. The committee finally decided, by a vote of five to two, to permit inquiries on the political connection of various persons.

Ideals of America and France Con trasted With the Conduct of Great Britain—Admiration for Gen. Cronie.

[A. P. NIGHT REPORT.] PARIS, March 3.—(By Atlantic Cable. Copyright, 1900, by the Associated Press.) France, beyond a doubt is anxious for the hand grip of friendship of the United States, and not only is this true of the government, but of all responsible French politicians, as well. The presentation of the Lafayette dollar to President Loubet today furnished another unmistakable proof of the existence of this feeling. Reference to the event in the French journals of all political shades have been invariably of the most sympathetic character, and the ceremony itself is treated as if destined to prove another link in the historical friendship of the two nations. President Loubet himself, the correspondent of the Associated Press has been informed by one entitled to speak, is charmed with the whole affair, and the manner in which it was carried out, and also thinks that the way the scheme had been taken up is an indication of the attitude of the great body of American opinion toward France.

The exquisite workmanship of the casket in which the Lafayette doflar was presented, formed an object of expectal admiration from all the French officials who examined it.

Some of the newspapers find in the Lafayette incident an occasion to draw a contrast between the ideals of America and France, and the conduct of Great Britain at the present time. One remarks:

"It is truly a fine spectacle to see two great republics invoking their souvenirs of heroism and celebrating the rights of their people, while England is going to strangle the Transvaal."

These expressions of sympathy for America throw into stronger relief the intense hostility now being displayed against Great Britain.

Ali the best organs, while sulgrising the rights of their people, while England is going to strangle the Transvaal.

A large exciton of public opinion demands that the European powers shall intervene and compel Great Britain to seize the present opportunity, now that her military prestige is restored, to make peace on the basis of the independence of the Transvaal.

(A. P. DAT REPORT.)
PARIS, March 3.—(By Atlantic Cable.] Robert J. The

Palace.
Mr. Thompson, accompanied by the United States Ambassador, Gen. Horace Porter, drove from the embassy to the palace in the Ambassador's carriage. On arriving at the Elysée at II:45 a.m., they were received by M. Mellard, subdirector of the protocol, and Capt. Haguet of the French navy, who was the officer on duty. The Americans were conducted to the President's cabinet (study,) where M. Loubet was awaiting them. By his slee were M. Delcasse, the Minister of Foreign Affairs, and Gen. Baillaud of the President's military Cabinet. Several members of the President's household were also present.

President's military Cabinet. Several members of the President's household were also present.

Gen. Porter introduced Mr. Thompson to President Loubet, and the presentation of the dollar was then made by Mr. Thompson in a few appropriate remarks. He said:

"Mr. President: In the name and on behalf of the President of the United States, I have the distinguished honor of extending to you, the high representative President of France, salutations and greetings of friendship.

"Upon the 17th of October, 1898, the anniversary of the victory of Yorktown by the French and American arms in the cause of liberty, the American school youths were invited by the President and Governors of the several States of the United States to contribute their pennies towards the erection of the monument in Paris to a son of France, our great and venerated ally, Gen. Lafayette.

"The responses of the children was universal, the movement a splendid success. In further eid and in honor of the work an issue of fifty thousand souvenir silver dollars was appropriated and ordered struck by Congress.

"Of these fifty thousand Lafayette dollars, the first to issue from the mint was especially preserved for your excellency by the President of the United States, and I have now the distinguished honor, Mr. President, of presenting to you this coin, a simple and sympathetic token in his name and for the people of the United States.

"I voice the sentiments of my countrymen when I express the hope that this memorial dollar, stamped with the likeness of Washington and Lafayette, may remain always, as it is today, an emblem of the amity and the unity of

Increase of Washington and Lafayette, may remain always, as it is today, an embiem of the amity and the unity of purpose of the two great republics of the world."

In reply the President said he was

ply touched by the kind America's President and particularly by the graci

of America's President and people, and particularly by the gracious manner in which the coin has been presented to him by Mr. Thompson. He begged the latter to be the interpreter to the President of his warmest thanks and sentiments toward President Mc-Kinley and the American nation. M. Loubet added that he congratulated himself on receiving this souventr, which was a fresh pledge of the reciprocal ties of esteem and friendship which had so long united France and the United States, and which he hoped to see draw closer and stronger, more and more.

President Loubet concluded with saying that it was especially agreeable to him that the mission was entrusted to Mr. Thompson, in view of the initiatory part which he took in the subscriptions of the school children to erect a monument to Gen. Lafayette in Paris.

The French President then invited Gen. Porter and Mr. Thompson to stay at luncheon, at which Mme. Loubet and M. Delcasse were present.

PARIS, March 3.—(Exclusive Dispatch.) Two men, who say they are from the Obark Mountains in Missouri, and that their names are William White and Silas Blank, have been engaging in train robbery in France after the most approved Jesse James methods.

after the most approved Jesse James methods.

After spending most of their money in Paris, they went to Bordeaux, and there hatched their plans. On a dark night last week they stopped a train between Bordeaux and Biarrits, by displaying warning signals. They then leaped into a sleeping car, and at the point of their revolvers robbed twenty-two passengers, obtaining at least \$1000. They then escaped, and as they were masked it was impossible to trace them.

Emboddened by this success, they made an attempt yesterday to rob the mails. At a railway station they sneaked into a mail express car unnoticed, and shortly after the train started, attacked the messenger and attempted to bind and gag him. He was a stout fellow, and resisted stubbornly. The robbers finally, unable to master him, flung him from the flying car. They then started to rife the money packages, but they had finished their work. They were both collared as they sprang from the car. The messenger, whose name is Serranto, was fatally injured.

MODIFICATIONS NECESSARY.

[A. P. EARLY A.M. REPORT.]

NEW YORK, March 2.—A special dispatch to the Herald from Washington says that some modifications in the plans for the Nicaraguan Canal recommended by the first Walker commission will have to be made.

This is made clear by reports forwarded to the office of the present Walker commission, from one of the surveying parties now in the field. It has been found that it will be impracticable to build the proposed dam across the San Juan River just above the mouth of the San Carlos dam. The Menocal plan proposed the damming of the San Juan Boow the mouth of the San Carlos by what has been termed the Ochoo dam. This proposed great dam was one of the features of the Menocal plan which many engineers criticised, and much doubt was expressed as to its practicability.

The first Walker commission reported in favor of the Boca San Carlos dam as preferable to the Ochoo dam. Borings were made which seemed to indicate that a rock bottom of the proposed dam could be found at a very short distance below the surface. One of the surveying parties sent out in advance of the present Walker commission was charged with making a more care-

seried, does not alrect the practicability of the Walker plan as a whole.
Nevertheless, the fact that this error
in the former survey has been discovered will be used by the opponents
of the capal as an argument for delay in legislation. The strongest argument of the oppositon has been that
nothing ought to be done until after
the report of the present Walker commission has been received. It is pointed
out that the surveys now in progress
are more exhaustive than any that
have hereiofore been made, and that
some defect in the former surveys
might be discovered that would make
the proposed route impracticable.
Senator Morgan will submit a report
to the Sepate on the Hay-Pauncefote
treaty from the Senate Committee on
Foreign Relations in a few days. He
will emphatically declare that the
Clayton-Billwer treaty is in force and
will discuss the nonfortification feature, showing its advantage.

RECIPROCITY WITH GERMANY. NEGOTIATIONS PROGRESSING.

WASHINGTON, March 3.—While technically speaking, negotiations looking to the making of a reciprocity between the United States and Germany are still, in progress, practically nothing has been accomplished in that direction since the departure of the derman Ambassador, Herr Von Holieben, for Germany early last summer. There is no disposition whatever on the part of the officials of the State Department to embarrass the German active prosecution of the negotiations.

While far from satisfactory, the existing conditions of the American pork the tolerated for a short time. The officials are hopeful that the time will be direct assurance that the time will be direct assurance from cerman authorities, but rather upon reports of the political situation in Germany, It is understood that when the German government has secured what is regarded as certain essentials of legislation from the German for the political situation in Germany. It is understood that when the German government has secured what is regarded as certain essentials of legislation from the German for the political situation in Germany. It is not the condition than it is all present the German government has secured what is regarded as certain essentials of legislation from the Germany for the political situation in Germany. It is not the thing the political situation in Germany in the same to Colgronians.

Washington, and the same to Colgronian with sumiciant the same to Congress of the Californian with sumiciant the same to Congress of the Interest in Adactor and submit the same to Congress of the Californian for the passed by the Senate Monday or Tuesday. In the same to Congress of the Ventucian of the Same to Congress of the Ventucian of the German and the German and the German active prosecution of the Californian the same to Congress of the Ventucian of the Californian the same to Congress of the Ventucian of the Californian the same to Congress of the Ventucian of the California during the passed by the Senate Monday or Tuesday, and signed by the P

the reciprocity negotiations at this stage.

Perhaps another reason for the negative course taken by our government is a desire to learn just what effect the ratification by the United States Senate of the pending French reciprocity treaty would have upon the German government. It is said by the officials here that as the French treaty gives preferential rates to many articles which figure largely in the list of German exports to the United States the effect of the practical application of the French treaty would be to confer upon France all that share of the American market now occupied by Germany. To save this important trade to her manufacturers Germany must, it is argued, secure a similar reciprocity treaty, and this can only be secured by an abatement of the restrictions upon the importations of American meats and other products. Thus, by a natural working of the laws of trade and commerce, it is conceived by the officials that our government may be able to entirely avoid a recourse to the tremendous powers lodged in the President of prohibition of trade with a nation that discriminates against the United States.

NEW YORK, March 3.—A special to the Herald from Washington says it is the intention of the Treasury Department, as soon as the pending Financial Bill becomes a law, to expedite as fast as possible the coinage of the silver bullion purchased under the Sherman act still remaining in the treasury.

There is still on hand, bullion purchased under this act costing \$78,000,605, and represented by that amount or treasury notes outstanding. The department has been coining this bullion into dollars at the rate of \$1,800,000 a month. The Financial Bill authorizes the coinage of enough of this bullion into subsidiary coins to bring the total subsidiary coins to bring the total subsidiary coins. In addition to this the department proposes to increase the coinage of silver dollars to \$4,000,000 a month, and the effect will be to have all this bullion coined and all treasury notes retired within a year and a half.

While it was not needed it will not do any harm except to strawberries, which are now being marketed. The ground in this vicinity has been too wet all winter.

BOOMS SAN JOSE BUSINESS.

[A. P. NIGHT REPORT.]

SAN JOSE, March 2.—No rainfall was ever more welcomed than that which came today and which has not yet ceased. While the orchards will receive great beneft, the grain will be most materially assisted. Large crops are now a foregone conclusion.

In town the effect of the rain has been shown in the increased business done by the Cured Fruit Association. Since noon fruit growers who had been holding back fearing a dry season, and a short crop, came pouring in to sign contracts. There seems to be no doubt that the requisite 75 per cent. of the prune acreage of the State will be secured and that the association will be on its feet by the first of April.

The rainfall for the storm amounts to 45 inch, total for the season 11.59, against 7.53 for the corresponding season last year.

EXPLOSION OF A LAUNCE.

TWO MEN BADLY INJURED.

[A.P. DAY REPORT.]

BAN FRANCISCO, March 3.—A launch of the United States transport Hancock blew up at the transport dock today, seriously injuring two men, the coller and a Chinese fireman. The cause of the accident has not been definitely determined, but from the statements of the Chinaman and a policeman who saw the plight of the little vessel, it would appear that the boilers had been allowed to run dry. The policeman says that the boiler and smokestack were red hed, and the Chinaman explained that there was no water in the boilers. The engineer, ciler and the mate, warned by the appearance of the boilers that an accident was imminent, ordered the Chinaman to open the boilers, and started to leave the vessel, but the explosion seriously injured the fireman and ciler before they could escape The launch did not sink, but is badly damaged.

Just before the explosion occurred, about twenty sallors were on the vessel, but the last of them were scrambing onto the deck when the accident happened. Had the explosion occurred a few minutes before it did, a number of men would have been seriously injured.

The damage to the launch is not as great as first supposed. A number of boiler tubes blew out, and there were other minor damages, but the vessel can be put into commission again within a few days.

CALISTOGA, March 3.—The stage robber is still at large, and his charces of escape are pretty good. The dog tracked him last night to within about four miles of Oat Hill, and in fact, was within about 40 yards of the bandit at one time. He heard the dog barking viciously at his heels, and at once covered his tracks with red pepper, and the dog, after getting a few whiffs of this, refused to work any further. The country is very rough, and, besides being very dark, rain commenced to fall and kept up a steady downpour until morning.

was taken. A dollar and a bogus quarter were picked up near the box. The box contained quite a large sum of internal refenue stamps, but these were not twiched. It is now thought by the officers that this is the same man who held up the stage last September, as his actions are very similar. He is thought to be an expert at the business.

jury of tweive men has been selected to attach the blame, if any, for the death of the miners at Iron Mountain. After being selected the jurors viewed the remains of the five unfortunates already taken out, and adjournment was taken until Monday morning. It is believed that the three remaining bodies will be secured by that time. One inquest will be held on the eight deaths.

After the jurors had examined the five bodies they were turned over to relatives and friends. The body of D. E. Ross was accompanied by the weeping widow and fatherless child to Willows, Glenn county, for buriat. Ross was the only married map of the five whose bodies have so far been secured. The body of J. Oates was taken to Sacramento for interment. It was accompanied by a brother. Another brother is sadly waiting at Iron Mountain for the recovery of the body of the fourth brother. Alfred Oates, Henry Catillon, A. Cavanaugh, and R. McCalllep were buried at one time this afternoon from a local undertaking establishment.

TRAGEDY AT LATROBE.

DEAD MAN IS IDENTIFIED.

[A. P. NIGHT REPORT.]

SACRAMENTO, March 2.—The mystery surounding yesterday's tragedy at Latrobe. Eldorado county, was explained today. G. S. Estey gave himself up and said he had shot Ed Hoffman in self-defense. Friends of Ed Wier of this city received word that he had been shot and killed at Latrobe. It turns out today that Weir was killed by Estey, but that the latter had always heard him called Hoffman in that locality. Hoffman is the name of Weir's stepfather.

Estey accused Weir of having written to a Placerville paper accusing his mother of killing a hog that was not hers. Both men had shotgruns. Hot words ensued and Estey says Weir raised his gun to shoot, but that he sot ahead of him.

A Placerville dispatch to the Recordulor ways the Coroner's jury today found Weir was shot and killed by Estey, but did not specify any charges against him. Estey is in custody of the Sheriff.

WEAK MEN, READ THIS! To men who have wasted the vivacious energy of youth by excessive high living; to men who have found the spark of vitality growing fainter, and who have, while yet young in years, found the spirit of power lessening, as if age had come on and brought with it the decay of all physical and vital energies; to such men, and to all men who feel that their vital forces are slow of action and lacking in the fire of youth Dr. McLaughlin's Electric Beit is worth its weight in gold.

THE FIRE OF YOUTH. SPECIAL. I am giving free ELECTRIC

A means of restoring youthful vigor is priceiess. Nothing in this world is worth more to a man who lacks that element. And yet here is a remedy which thousands of men need, and they fall to grasp it because of fear that it might fail. It is hard to believe that Dr. McLaughlin's Electric Belt will do what is claimed for it until you speak to some one who has tried it. Your most intimate friends are maing it and being cured. They don't mention it, because few men want any one to know they are in need of such a remedy. The makes men strong; it removes the effects of early habits, dissipation, overwork and all violation of the laws of Nature. It helps nature to mend and makes vitality perfect.

DR. McLAUGHLIN'S ELECTRIC BELT.

The failure of medicine, of quacks, and even of other so-called Electric Belts, is no argument against Dr. Mc-Laughlin's Electric Belt. No other treatment, no other Belt, is in the same class with it. Everything else may fail, and still Dr. McLaughlin's Belt may cure. It HAS cured thousands who have tried other remedies without avail. No man who is weak will make the right effort to regain his power until he tries Dr. McLaughlin's Electric Belt. A fair trial of this great remedy will make it unnecessary to ever use any other.

Be true to nature, be true to yourself and your friends. Eggain your health. Give the color of vigor to your cheeks, the sparkle to your eye. What use has the world for a man who has not the courage to face the battles of life. Such courage comes from a system greatly endowed with the vital force or Electricity. Regain your strength for good by using the wonderful Electric Belt.

GREAT TURF EVENT.

RICH BURNS HANDICAP WON BY IMPERIOUS.

BAN FRANCISCO, March 2.—On a heavy track, in a drissling rain, Dr. H. E. Rowell's bay gelding Imperious, by Morello, dam Helen Beratch, won the fifth Burns handicap, the classic event of the California turf, at Oakland today. This is the second time Rowell has captured the rich stake, having won with Satsuma in 1884, and finished second with the same horise last year. Contrary to pasi precedents, the winner today was well backed at short odds; in fact, the stable may be said to have been favorite, though the price on Acrobat was shorter at post time.

The plunge on Acrobat was enormous, and from the opening odds at 5 to 1 the money of the best-informed talent was purchased by J. F. Schorr this morning and F. W. Brode scratched out of the race is order to give T. Burna the mount on Acrobat. Rowell's stable, Imperious and Malay, were well played by the smaller betters. The others were backed at odds ranging all the way from 5 to 1 to 50 to 1.

There was a delay of twenty-five minutes at the post, and this, with several false starts, killed whatever chances the weight-packers had under more favorable conditions.

To a fair start Pat Morrissey went to the frent with a rush, and at the half had opened up a gap of three lengths from Dr. Sheppard, with Imperious second, half a length from Arisees, who had come up from the rock; Acrobat was fourth, Malay fifth, Formere sixth, and the others strung out with Sheppard and Forte bringing up the rear. Into the stretch Pat Morrissey was isading by four lengths, Imperious second, half a length from Arisees, who had come up from the rock; Acrobat was fourth, Malay fifth, Formere sixth, and the others strung out with Sheppard and Forte bringing up the rear. Into the stretch Pat Morrissey swung still a length and a half in front, but he was tiring fast, and soon gave way to Arbaces, with Imperious at his seed for the proposed galanting the former sixth, and the others strung out with Sheppard and Forte bringing up the rear. Into the stretch Pat Morrissey swung still a length and

Devin, on Imperious, rated his horse splendidly, and when the time came to urge his mount, he responded galiantly, and came like a shot from the bunch, drawing away from the front rank as if they were anchored, and winning by two lengths; time 2:10. It was hard to separate the next five horses, as they were only heads apart, but the judges placed them, with Romante in the place and Formero third. Onsiellater fourth and Arbaces fifth. The track favored Imperious, who is usuatially a mud horse. He had much the best of the weights, With a fast last it is reasonably certain that Remante would have captured the plus. under discussion, even the query as to why the Prussian government gave a Prussian decoration to a German of Chicago. However, Count Yon Buelow, the Minister for Foreign Affairs, made a good showing, and got his sairary voted.

The chances of the Naval Bill have grown rather worse later. Both the Centre the Conservatives, and the Agrarians are demanding compensation for their vote, the former asking for the recall of the Jesulis, and the latter demanding a meat law to suit their convenience, and guarantees from the government that Agrarian interests will not be neglected in the projected commercial treaties.

There will evidently be a hard pull to get the bill through, though there is every indication that the popular sentiment among the electors is rising for the naval increase.

The National Zeltung, speaking about the Meat Bill today, expresses the belief that the government will not approve the bill as now constituted, and thus the its hands regarding the coming commercial treaties, not only with the United States, but also with Russia Scandinavia, Holland, etc. It says: "A general tariff war would be tantambunt to meat usury."

The South African war continues to hold the attention of the Public here. While sympathy for the Boers continues, respect for the British has risen under their latest successes. Lieut. Gen. Becher. In the Lokal Anzeiger today, says the well-planned action of Lord Roberts has brought about a total change at the seat of war, a change such as a layman would not have thought of. The writer concludes that the war for the Beers in now a hopeless struggle for they lack that which alone could have given their victories a permanent value: that is to say, the capacity of fructifying victory by pursuing the enemy to the point of arnibilation.

an body are the kidneys. They remove all the waste and poi-son from the system. They are the natural filters of the body, and just as sure as water is purer and clearer after it has passed through a filter, so is the human system purer, so is the blood richer and more rosy when the kidneys

richer and more rosy when the kidneys are properly performing their functions. You may feel as though you have no kidney or bladder trouble. It is best to be on the safe side. Find out whether your father or mother had kidney trouble, and if so be on your goard, for no disease follows from generation to generation like kidney disease.

When your kidneys are not doing their work, some of the symptoms which prove it to you are pain or dull ache in the back, plenty of ambition, but no strength, sediment in the urine after standing twenty-four hours, scanty supply with scalding irritation in passing it, may be obliged to ge often during the day and to get up many times during the night. Catarrh of the bladder, gravel, excess of uric acid, you may feel as though you had heart trouble. Rheumatism, bloating, dark circles under the cyes, weak stomach, poor digestion are unmistakable evidence that your kidneys need immediate attention.

Swamp-Root is the wonderful disco-ery of Dr. Kilmer, the eminent kidney and bladder specialist, and it will be found in the dispensary of every well regulated hospital; it is taken and rec-ommended by the foremost physicians in the land, Thousands of men and women eccupying useful positions today owe their very lives to the use of Swamp-Root, the great kidney remedy.

NEW YORK, March 3.—The Times says that although at a conference of representatives of trunk lines on Thursday it was agreed that the trunk lines notice of abrogation of prorating on points west of Chicago and the Missispip should go'into effect on March 1, it was learned yesterday that some of the lines are still accepting and sending freight to those points on the old planthese interactions of the lines are the Chesapeake and Ohio, the Norfolk and Western and the Asheville line. The excuse given bythem is that they being differential lines have not yet received notice from their trunk line connections that such an agreement has been made. They also say that as soon as such notice has been received they will follow the action of the other lines.

More about Oriental Rugs

This is a gorgeous display we are making now. They came to us by a stroke of good fortune, direct from bonded warehouses, where our buyers bought them in the original bales. Turkey, India and Japan have contributed largely to this wonderful display of weird designs and colors of barbaric splendor. Its well worth seeing and studying. No description can do justice to these bits of beauty. The best part of the tale is, that we are in a position to sell these under what you would ordinarily pay.

NEW OTAY FLUME.

The water consumers under the San Diego Land and Town Company's system intend to lose no time in making use of the water from Otay dam placed at their disposal by E. S. Babcock. Engineer H. N. Savage of the Land and Town Company placed a corps of surveyors at work yesterday, laying out the route for the flume line from Otay reservoir to the distributing system, at the Richardson ranch, Chula Vista. The flume line will be ten miles in length, with a carrying capacity of 3,000,000 gallons per day. It is to be inclosed so as to avoid evaporation. The assessment plan is to be tuse by the ranchers in pay for the building of the flume, and they may pay in cash or may work out their payments. NEW OTAY PLUME.

MERCHANTS TO ORGANIZE.

SAN BERNARDINO, March 3.—
[Regular Correspondence.] A meeting of business men was held last evening at Armory Hail, when preliminary steps were taken looking to the organization of a local Board of Trade. James H. Boyd presided and Frank D. Keller acted as secretary. The meeting was called for the special purpose of taking action with reference to the suit brought in the name of A. W. Holdskom against several railroads to obtain lower freight rates for this city and to abolish the arbitrary rate on eastern shipments, which compels local merchants to pay more for merchandsee shipped from the East than Los Angeles merchants are asked to pay. Attorney E. E. Kats outlined the work he thought ought to be performed. The members of the Interstate Commerce Commission will visit San Bernardino March 23, when it is proposed to make the strongest possible showing for the merchants.

Many of the representative business men of the city were present at the meeting. It was decided to effect permanent organization as rapidly as possible. To that end a Membership Committee, consisting of D. J. Carpenter, Thomas Hadden, Joseph Israel and Sam Levy, was appointed, with instructions to interest every merchant, shipper and property-owner in the organization. A meeting will be held Monday evening in Justice Thomas's courtroom, when, it is believed, permanent organization will be effected.

CELERY GROWING.

INCREASED FRUIT ACREAGE.

SANTA ANA. March 3.—[Regular Correspondence.] That there is splendid profit in the growing of peaches and pears in certain sections of the Santa Ana Valley there no longer remains any doubt in the minds of practical fruit growers. The great trouble in the production of these fruits here-tofore has been the fact that there was practically no local market for them, each grower having to create his own market either locally or in the East. It is different now, however. There are three canneries in the county which can consume all the peaches and pears that are grown in the valley, or that will likely be grown for several years to come. This fact has resulted in a great impetus being given the growing of these fruits particularly, and the past year there have been acres planted to young peach and pear trees. The damp lands south of Santa Ana are said to be admirable for the growing of Bartlett pears, producing a fruit of exceptional flavor, and the trees yielding prolifically. This land is purchased at from \$50 to \$150 per acre, according to location. INCREASED FRUIT ACREAGE.

Sentences Suspended.

Charles Young was fined \$10 by Justice Austin yesterday for battering a Deputy Constable who had been placed in charge of Young's restaurant as keeper, on account of a civil action brought against him by an exemployé for wages. Young is already serving a term in the City Jall for battering an employé, and the court suspended the last sentence.

James Eiden, an invalid, also received a suspended sentence of \$40 or forty days for petty larceny. N. Bonfilo of the Exceisor Laundry alleged that he caught Eiden in the act of stealing tools from the laundry stable.

E. Harris, a colored man, who was arrested on a charge of attempted burglary, was allowed to plead guilty in Justice Austin's court yesterday to a charge of battery. Several nights ago E. D. Thorne, a citisen, caught Harris in the act of going through the refrigerator of a boarding-house on Main street, near Fifth. Harris showed fight and struck Thorne, he alleges. in the face, but was subdued by the latter's gun. The court imposed a sentence of \$100 or 100 days. He took the days.

Mammoth Stock of Dry Goods.

Is due our many patrons for the inadequate service of Saturday. But we were taxed far beyond our expectations, and the 50

extra sales people added to our already large force were not equal to the demands made upon them. The morning

shower somewhat hindered early buying, but by ten o'clock the counters were thronged with pleased shoppers and from

then until closing time there was no let up. We will have an additional force here Monday morning which will make

shopping easier and quicker from now on, at this greatest of all Los Angeles dry goods sales.

Of J. J. O'Brien & Co., was known throughout the length and breadth of the State of California, and the Pacific coast, as a criterion

of high class merchandising. That tells you WHAT we are selling. We bought this great stock of goods at a great sacrifice, and we are selling likewise. That tells you WHY we're so busy. New lots are furnished as fast as others are sold out. Many goods are still to arrive; what they are we do not know except that there'll be bargains galore. Monday will witness an overturning of prices and an array of bargains in The Drapery and House Furnishing Department. Come.

strike in that city would be settled in a short time.

The strike in Chicago is looked upon as a test of strength of the union by the labor leaders, and unions affiliated with the Material Trades Council, which yesterday resolved to support the machinists to the end, will not be ordered out until cities demand it. A meeting of the Executive Committee of the Machinists' Union was held today to map out a plan of campaign. A number of small firms not affiliated with the Manufacturers' Association signed the scale during the day, and the men were told to report for work. So far, however, there are no signs of yielding by the Manufacturers' Association.

REMARKABLE RESULTS OBTAINED AT PASO ROBLES.

[A. P. NIGHT REPORT.]

UNIVERSITY OF CALIFORNIA.

March 3.—Prof. John A. Myers, formerly director of the agricultural experiment station of the University of West Virginia, has just returned from a visit to the Paso Robles experiment station of the University of California.

Prof. Myers was especially struck with the remarkable results which have been attained at Paso Robles with the cultivation of the Australian sait bush. He declared that if the farmers would plant sait bush and devote their attention to the raising of stock, that in time the upper valley of the Sailnas would become as famous for its horses and cattle as the bluegrass region of Kentucky. Those portions of Montercy, San Luis Obispo, Kern and Santa Barbara counties which lie in the upper part of the Sailnas Valley he declared especially fitted for farming on a large scale, and not well adapted for fruit growing or extensive cultivation.

as part of a theatrical company, or which Messrs. Ludlow and Simith were the managers. From there she went to Cincinnati, and thence to Louisville, and between those cities she alternated during a period of three years. She excelled in comedy, in which the exhibited an archness that was very attractive. But her forte was pathos. In 1844 she went on a visit with her father to her grandparents in Dutchess county, N. Y. While she, was at their house, the manager of the New York Rowery Theater tendered her an engagement and she accepted. Her debut in New York excited a great sensation; one which lasted for a long time, and proved highly remunerative to herself and the management. After her engagement had been protracted for a long time, she commenced traveling, young as she was, as a star, and at every place she appeared she increased in popularity.

the south may be seen attending the by the Hayne family as "a spoiled child."

After she married her popularity seemed to wane. When she appeared in public she drew large enough audiences, but there did not appear to be that great enthusiasm which greeted her at former times. The people by their behavior plainly said: "You were ours until you married, but now you are Dr. Hayne's."

In time she came to California, accompanied by her husband and, one child. Her husband, it was alleged, was an intemperate man, and did not bestow upon her that attention which a husband should. Still she continued to live with him, and with the greatest of motherly care, reared her family. Finally she left him, and traveled to the principal cities of the Territories and new States, and appeared professionally in each. During this timeshe sought and obtained a divores from Dr. Hayne. Afterward she returned to New York. There she was married to James G. Cooper, the son of a well-to-do family.

Julia Dean was esentially feminine, and most affable in her manners. Herowr sex were extremely partial to her. Frederika Bremer, a famous writer, whom she met at a Mme. She was always religiously inclined and was a member of the Episcopal church, and Dr. Chapin, a celebrated New York divine, once referred to her in terms of generous eulogy from his pulpit. Those were the days when the drama was the newspaper, the last new book, the finest picture of the season, or the event of the day, when to be refined and up with the world, men and women in society were compelled to be able to note the delicate shading in the actor's art.

The presence with the Neill company, and the success of the present Julia Dean, calls these things to mind,

In the report of the board of directors of the library, recently submitted to the Council, they show the urgent need for more books and for a suitable library building. In one department of the library there are 800 volumes less than there were five years ago, owing to failure to make good wear and tear of use, and this again is due to lack of sufficient appropriations by the city government.

keep on trying. We are pleased to note that Gen. "Bobs" will be allowed to do the strategy business in South Africa, and that the military experts who are crowding the newspaper offices of London so densely that there is no room for the regular reporters or proof readers, will refrain from leading the embattled hosts through the columns of "The Thunderer" and the yellow Mail. This will probably be just as well, although the war will lose many of its picturesque and most comical features because of this change of campaign methods. We have come to look upon London newspaper strategy as quite the fun-niest thing there is outside of vaudeville.

RIVERSIDE, March 3.—[Regulas
Correspondence.] The Houghton disbarment suit, now on trial in Judge
Noye's court before Judge Hughes, of
San Diego, promises to become one
of the celebrated cases of the State.
The suit was brought by Matthew
Gage to effect the disbarment of R. E.
Houghton, a prominent San Francisco attorney, who has been connected with many important cases in this county. The accusation against Mr. Houghton is that he willfully attempted to deceive the Secretary of the Interior, when the Gage land contest was before that official, by offering in evidence photographs alleged to show the house and grounds of W. E. Atwater, on section 30, the land in dispute, but which in reality was the property of O. A. Lowentrout. The Lowentrout property is highly improved. That once occupied by Atwater is not improved. The accusation charges that the photographs were made under Houghton's direction to overcome the decision of the Secretary of the Interior, which reads: "It is apparent that the land in controversy would be valueless as homesteads to the present entrymen. or others has for

SOONER THAN EXPECTED.

Club was nearing its limit, applications have been coming in faster than ever,
The time is now close at hand when we must say "no more sets left." Indications show that the sets will all be gone much sooner than we ever expected. Yesterday was a very busy day-indeed, every day last week was busy -and tomorrrow many of the remaining sets will go. You are too late now to get the cloth binding. All the sets in this style have been taken. The last of them went on Tuesday, and now some of the other bindings are perilously low. Call and order your set tomorrow, if for no other reason than to take your choice of the three bindings that still remain. It will not do to put this off for a day or two, If you delay you will certainly be disappointed.

Our offer to save you about one-half of the price of The Century is one that can never again be duplicated. The Century is a work that everybody must buy some day, and we now offer it on a plan which does away with all the middleman's profits and commissions. In addition you get the privilege of paying the special price in small monthly payments if you choose. You get the complete work as soon as you make the first payment, and you may take more than a year to pay the balance. It is just like saving money by putting it in the bank to join our Century Club, and this is why the club has proved so popular. In a nut-shell, our offer is to supply you with a complete set of the final edition of

The Century Dictionary and Cyclopedia and Atlas at a Saving of about 50 per cent. and On Small Monthly Payments.

THE OREATEST REFERENCE LIBRARY IN THE WORLD FOR THE COST OF ONE WORK.

The Century Dictionary and Cyclopedia and Atlas is the greatest work of reference the world has ever seen. It was made at a cost of \$1,150, 000, No expense was spared in making it as perlect as the work of man can be. Over 500 of the world's best scholars spent many years of their

lives in collecting and arranging the information the volumes contain. It has taken its place in the universities and courts of law of this country and Great Britain. It fact, wherever the English language is spoken The Century is the court of last resort, beyond whose authority no one can go. It is universally useful. It can be used by man, woman or child, and in connection with every branch of human knowledge. Externally it has been made worthy of its high scholarship. Only the best imported morocco was used to bind it. The gilding and embossing have been done with consummate skill. The paper was especially made for The Century in order to show the 8,000 beautiful illustrations to best advantage. The artists who made these illustrations are the same men who made The Century Magazine famous. The printing was done by DeVinne, the best printer in the world.

The Century contains 150,000 encyclopedic articles, 50,000 more than any other work; 500,000 definitions—no work approaches this number; 300,000 quotations-no other work has one-seventh as many; 300 of the most beautiful 50,000 of this number,

Do not put this matter off, but act as soon as you possibly can. We tell you how you should proceed, whether you live in Los Angeles or outside. Persons Who Live in Los Angeles

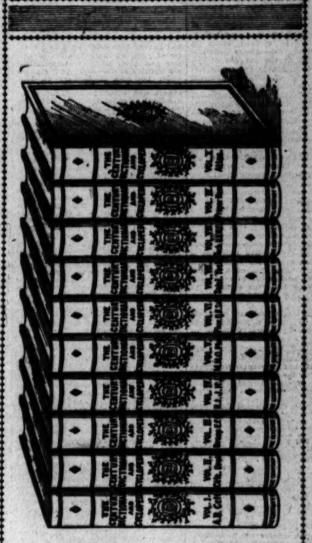

should call as early as they can tomorrow at our counting rooms, where the volumes in the bindings that remain can be carefully examined, and where expressions of opinions regarding the work by men who mold the opinions of the public can be read. The persons who are best able to judge, universally recommend The Century as the most practical and complete reference library in the world.

Persons Living Elsewhere should write to us at once, or should forward one of the blanks below. The best way is to fill in, cut out and mail us Registration Blank No. 1. On receipt of this we will reserve a set in the name of the applicant, and will for-ward you an illustrated pamphlet containing specimen pages, together with descriptions of the various bindings, which will aid you in your choice. Those persons who are not so particular about the binding may use Inquiry Blank No. 2, but they run the risk of being too late.

The time for correspondence is too short to admit of any certainty. The best way is to have a set reserved and then to select your binding; but we will forward, free of charge, a handsome pamphlet containing specimen pages and sample map of the work, together with full information regarding the club, to all who write to us before the last set is taken.

Col. Harrison G. Otis. Dear Sir:- have wanted the Century Dictionary and Cyclepedia for some time, but upon receiving and examining the set re-ceived through the Times Century Club, I find that I needed it more than I wanted it. It contains, in a convenient and succinct form, information that it would take too much of a busy man's time to find elsewhere. Indeed, I regard it as indispensable to every writer, reader or thinker. Very truly yours,

I make daily use of my Century Dictionary. I never ask a stion beyond it, and am always satisfied with what it tells me. It is at the head of its class, and stands in the first class. ROBERT J. BURDETTE.

I am well aware of the fact that the Century Dictionary and Cyclopedia needs no recommendation from me. Its standing as a literary production, its exhaustive treatment of words of the English language, together with its encyclopedic features, fully justify the high claims made for it by its authors. I have used The Contury in connection with others and I find it very satisfactory. It should be in every library, school district and household. In fact, no library is complete without it. Any person knowing its value and scope with surely make much sacrifice to secure it-

A HISTORY OF AMERICAN PRI-

Nerve weakness is the Be-ginning of all serious diseases. Nerve weakness precedes Nervous Decline and extreme Nervous Pros-tration, therefore every man and wo-man may readily understand the im-portance of guarding against a com-plete breaking down of the nervous system. If any of your nerves are weak it affects the organs or portions of the body that are controlled by these weakened nerves. Thus, if the nerves of the heart are weak, it affects the action of the heart; if the nerves of the stomach are weak, it causes stom-

"It is fitting that our privateers should be properly recognized in the history of our navy, inasmuch as they formed the largest section of our maritime forces in those struggles. The declaration of Paris in 1856 sealed the fate of this style of warfare, so far as civilized countries are concerned; for, although the United States and Spain did not ratify the declaration, yet the course pursued by both nations in the Hispaño-American war, and the propositions made by our delegates in 1899, showed plainly enough that they had renounced old-time privateering. Privateering—in its proper form, however, exists today. The essential feature of privateering is commerce destroyers of the navy today, like the Columbia, Minneapolis and Olympia, take the place of our early privateers, and are capable of doing the work more effectively."

[London Telegraph:] The following the without special authority. It was

repealed the provisions of act of March 1, 1887, which provided that the Hospital Corps should not be included in the effective strength of the army, and that this corps was therefore included in the 65,000 men authorised by this act, and that the number of hospital stewards required could be fixed by the President. It was, however, decided by the Judge Advocate-General and the Comptroller of the Treasury that the provisions of the act of March 1, 1887, were not affected by this legislation, and that therefore the Hospital Corps was not included in the effective strength of the army.

This decision having been made at too late a time to permit of attempts to secure any legislation in the last sensition of Congress, the allowance could not be summarily discharged without seriously impairing the efficiency of the service. Additional hospital stewards are urgently needed, especially for service in the Philippines, and there are a large number of deserving acting bespital stewards who are awaiting opportunity to take an examination for promotion. In the meantime they have been discharging the duties of the hospital stewards without corresponding rank and pay.

RETICLES OF PRESENT INTEREST ON CURRENT ARMY AND NAVY SUBJECTS. Compiled for The Times by a Veteran Officer.

HIGH EXPLOSIVES.

The question of high explosives is still under consideration by the Ordnance Departments of both the army and the navy. The ordnance officers of the army have practically concluded the preliminary investigation of thorite and will now devote their time teating the rive explosive, marsite. The maval ordnance officers are at present considering the result of the exhibition test of marsite held at Lowell, Mass, and during the past week there have been several tests of thorite at Indian Head. It is asserted by officers of both departments that no perfectly satisfactory high explosive has yet been found, and while thorite has so far proven by investigation the best explosive examined there is a belief that the question of high explosives is still in an experimental stage. While both thorite and marsite have given good results at the exhibition tests the officials have not yet learned by experience the keeping qualities of either invention. This seems to be the missing link in all high explosive discoveries. Thorite is the invention of Dr. Tuttle and marsite the discovery of Mr. Hathaway. For some time both gentlemen have worked almost side by side in their efforts to secure an explosive that would be very powerful and at the same time perfectly safe. Their productions are said to be entirely different so far as composition is concerned. While nothing is admitted by either inventor it is asserted on good authority that thorite is an ammonium nitrate and marsite a pieric compound. Thorite has been thoroughly tried at Sandy Hook by the ordnance experts of the army and pronounced very satisfactory. A high ordnance officer said recently that thorite would undeductedly be used by the army unless something better is produced. Now that isfactory. A high ordnance officer said recently that thorite would undoubtedly be used by the army unless something better is produced. Now that marsite has come to the front the ordnance experts will direct their attention to it, though favorable action will depend greatly upon the question of its composition. It is not likely to receive much favor if it proves a pieric compound, as there is a prejudice sagainst pieris acid explosives.

Gen. A. R. Buffington, Chief of the Department of Ordnance of the army, and Admiral O'Neil, Chief of the Naval Ordnance Bureau, have each placed reders with Mr. Hathaway for a quantity of marsite for examination and set by the ordnance experts. Meanwhile the navy will continue to look

RATION'S COAST DEFENSE.

[Boston Globe:] At a recent meeting of the board of directors of the Boston Chamber of Commerce, presided over by Pessident William H. Lincoln, the following resolutions were adopted relative to strengthening the coast defenses of the United States:

"Whereas, public attention has been called to the necessity of a substantial increase in the coast artillery; whereas, the recent war with Spain demonstrated the great importance of this arm of the service for the protection of the estire sea coast of the United States whereas, from official information furnished by officers of the regular army, it appears that the present artillery ferce available is insufficient even to keep the guns and mortars now in position in repair; whereas, in order to furnish one detachment for the guns and mortars now in place, including range-finding men, electricians and noncommissioned staff, not less than 18,402 soldiers are required, without provision for guard, sick, etc.; whereas, there are at present but 360 men on duty about Boston Harbor, where 1100 are urgently required; be it "Resolved, that this body respectfully petitions Congress to make an immediate addition of seven regiments to the artillery force of the army, providing a jotal force of 19,404 enlisted men. "Resolved, that we heartily second similar resolutions recently passed by the Chamber of Commerce of the State of New York.
"Resolved, that these resolutions be spread upon the records of the chamber and a copy forwarded to the president of the United States, to the Secretary of War and to each Senator and member and a copy forwarded to the president of the United States, to the Secretary of War and to each Senator and member of Congress from Massachusetts."

The Chief Justice of Samoa Says Peruna is The Very Best Catarrh Cure.

"I have tried one bottle of Peruna, and I can truthfully say it is one of the best tonics I ever used, and I take pleasure in recommending it to all sufferers who are in need of a good medicine. I can recommend it as one of the very best remedies for Catarrh."

On December 31, Chief Justice William Lee Chambers, a native of Georgia, held court in Apia, Samoa, and told the stalwart natives and the German and English and American residents why they should all regard Malletoa Tanu as King, instead of recognizing the rival claimant, Mataafa. The trial had lasted eleven days; Samoan genealogies, customs, titles and practices had been examined and discussed; and finally the Chief Justice decided that Tanu, who was the son of the late King Malletoa, and who, by the gift of the people, had been endowed with the name of Malletos, was the duly elected King.

A tonic is a medicine that gives tone to some part of the system. There are liferent kinds of tonics, but the tonic most needed in this country, where catarrh is so prevalent, is a tonic that perates on the mucous membranes.

Peruna is a specific in its operation upon the mucous membrane. It is a tonic to the mucous membranes and to a letter-from 14.17 K street, N.W., Washington, D. C., says:

"As a mative born Cuban, serving as feet ien a. It gives tone to the minute blood vessels and the terminal nerve of fibres. Catarrh cannot exist long where Peruna is a specific in its operation upon the mucous membrane. It is a tonic which is treet, N.W., Washington, D. C., says:

Madame Yale,

REDISTRIBUTION of the Kipling Books seems absolutely necessary in order that none of our patrons who are desirous of securing the books may not be disappointed. Our, first supply for distribution was entirely inadequate to meet the unexpectedly large demand. These books are bound in two styles, one, a very neat and tasty cloth binding, and the other a plain paper binding which is only toc per volume, the cloth binding being 20c. Fifteen volumes complete the set in either case. Every volume is complete in itself. The books are printed from very handsome, clear type, a condition which helps to make the reading of the books a real pleasure. THE TIMES was very fortunate in becoming a member of a syndicate of prominent newspapers which contracted for an edition of over one million copies of these books. In this way the syndicate were able to get the books at an exceedingly low figure, and The Times and its patrons reap the full benefit of this arrangement. These books will be sent to any mail address upon receipt of coupon for the volume you may desire, and the money in accordance with the style of binding you wish. City patrons may purchase the books at the Subscription Department of The Times. Patrons who may desire to purchase a complete set of books in either binding may do so upon proving their identity as Times subscribers, and thus avoid the necessity of clipping out the entire set of coupons. Parties who are not at present subscribers to The Times and wish to take advantage of this splendid offer, may do so by sending their names and addresses to The Times' Subscription Department, and the paper will be served by carrier or mail as desired. The distribution will begin with Vol. I., on March 6th, 1900, and continue daily thereafter, the coupons being numbered according to the volume which will be on sale that date.

Patrons purchasing these books will find in the back of each volume a coupon. By cutting out the entire set of coupons and sending them to New York, in accordance with the printed instructions on the coupon, you will receive a fine steel engraved portrait of Mr. Kipling, printed on fine paper, 9x12 inches. and ready for framing. This portrait regularly retails at \$1.00 and you should not fail to take advantage of this proposition to get it free by becoming owners of the fifteen volumes in either style of binding you may desire. Address with coupon and cash,

Dress Goods at \$1.00.

The \$1.00 a yard possibilities have been largely increased during the last week by new arrivals in all sorts of popular weaves. Notable among them is the Khaki cloth and broadcloth plaids. The popularity of tailor made dresses will keep plain and mixed fabrics greatly in demand. The effects are different from last season. Changes have been made in the styles of weave and in the colorings. While the following names may be familiar the cloths they represent will be different and new. \$1.00 a yard is a very low price for the qualities mentioned.

Latest silks at \$1.00

New silks are here in abundance. Take for instance, the foulards, and you will find them at all prices from 50c to \$1.25. To illustrate the variety, we quote from among the assortment at \$1.00 a yard. The very latest things that have been brought out either in this country or abroad. So many different kinds cannot be described. We can simply hint at the variety. Excellence of quality will be found in every yard. Our silk business has increased to vast proportions. Washable dress stuffs.

Woven or printed, which shall it be? Both are stronger than ever in their beauty and weave. Rivals to the last thread. A battle royal is raging between them. Which will you choose? Some are striped as uniformly as rows of orange trees, while other stripes are as unruly as a rail fence. Ginghams, while plaided, are very different from those of last year. The patterns are not so set and striking. The printed cottons come in a vast variety of dainty and refined patterns. Some are in very choice small effects. Colorings and placings of designs are the chief charms. Our gathering of washable fabrics, taken as a whole, is too vast to describe. Printed words cannot give an idea that a single glance will reveal. The showing is free—free as air. If anything appeals to you we will be pleased to sell, but there will be no urging. You are invited to inspect.

STREET OPENING.

RECENT DECISION LEAVES PRO-CEEDINGS BADLY TANGLED.

About Forty Streets Will Be Affecte Belief That the Change Will Bene-fit the City—Tunnel Work, Assessment Begins.

Ever since the recent decision of the State Supreme Court regarding the opening and widening of streets in the city of Los Angeles was received by City Hall have been inundated with questions regarding what streets were affected by the decision, and how and on is sweeping in its nature and will sion is sweeping in its nature affect in greater or less degree all street opening and widening proceedings that have been instituted by the Council since November, 1896. The books of the Street Superintendent

books of the Street Superintendent show that thirty-three etreet-opening and widening accounts are still unsettled, and the record of Council proceedings indicates that ten proposed street openings will have to be abandoned and new proceedings instituted under the provisions of the charter.

A great many complications will ensue in relation to those streets that have been partially completed under the general law. In many instances a large part of the money assessed by the Street Commissioners has been paid into the city treasury, and disbursed in accordance with orders signed by them. On some streets, a part of the property necessary for the opening and widening of the street has been acquired by the city, and the deeds recorded. Other property along the same streets has not been acquired and whatever proceedings have already been taken to condemn are yold.

deeds recorded. Other property along the same streets has not been acquired and whatever proceedings have already been taken to condemn are void. In order to complete the opening or widening of the street, as the case may be, it will be necessary to begin new proceedings under the charter provisions. In regard to the matter, the City Attorney will report to the Council, on Monday as follows:

"The Supreme Court of the State of California having just decided in the case of Califanan Hyrne vs. John Drain, Street Superintendent, that the street-opening act of March 19, 1900, is no longer operative in the city of Los Angeles, and has not been in force therein since the adoption of the constitutional amendment of section 6, Article XI, adopted in 1886, and that all proceedings for opening or widening streets, lanes or alleys in said citymust be taken under the charter, I have to advise you that all proceedings now pending, if instituted since November, 1886, must be abandoned. Some steps will have to be taken to refund the moneys collected on assessment that have not yet been paid out, but I am not yet clear how this can be done."

It is very probable that a test case will be brought in the court, and all

Kohler street, from Ninth to Twelfth: Bay street, from Wilson to Santa Fé avenue: Lake street, from Ninth to Tenth: opening an alley in the block bounded by Spring, Main, Third and Fourth streets: Burlington avenue, from Sixth to Maryland: Bellevue, from Buena Vista to Castelar.

All proceedings for the improvement of these streets will have to be abandoned under the construction placed on the Supreme Court decision by the City Attorney. This will entail the solution of many complicated legal questions, and will create much additional work for the City Attorney's office.

FINANCE COMMITTEE.

MANY DEMANDS PASSED. The Finance Committee at the reg-ular session yesterday morning ap-proved demands aggregating several thousands of dollars. Little other bus-iness was transacted. An estimate was presented by the City Engineer show-ing the amount due Sweneya A. Mill. presented by the City Engineer show-ing the amount due Swensen & Hill, azsigns of C. L. Powell, on their con-tract for the construction of the Third-street tunnel. The estimate which cov-ers the period from the letting of the contract to March 1, shows that the following work has been done: Excavation at west approach, 15,300 cubic yards, at 25 cents per yard, 53825; excavation, east approach, 4000 cubic yards, at 40 cents, 31600; exca-

at \$15 per thousand, \$5145; total, \$34,
\$57.40. Deducting the previous estimates

amounting to \$24,534.62, the 25 per cent. etained by the city, \$8508,10, and \$125 till due for filling the cave at the vest end, leaves \$1289.68 due the contractors. A demand for this amount was passed by the Finance Committee yesterday. For extra work on the tun-nel Swensen & Hill will receive \$541.20. This includes the construction of an This includes the construction of an auxiliary wall to reinforce the west portal wall, 53 cuble yards concrete, at 36, \$318, and 226 feet of sewer on Hope and Third streets, \$223.20. The total contract price for the tunnel was \$38,600. The amount of work done on the Broadway tunnel by Edwards & Beyrle, the contractors, is shown by the Engineer's estimates to be as follows.

Excavation, north approach, \$100 cuble yards, at 25 cents, \$75; excavation, south portal, 160 cuble yards, at 25 cents, \$40; excavation, in tunnel, \$730 cuble yards, at 25 cents, \$40; excavation, in tunnel, \$730 cuble yards, at 36 cents, \$2184; concrete work, \$80 yards at \$5.60 per yard, \$3120; brick work, 167 thousand, at \$17.56 per thousand, \$1872.50; total, \$7991.50. Deducting the amount retained by the city, \$1997.87, and the amount of previous estimates, \$2012.5, leaves, \$3372.38 still due. A demand for this amount was passed by the committee

Protecting the River.

During the past dry season the Health Officer has experienced much trouble in protecting the river from poliution by cattle that were pastured along the bank. Several arrests were made, and in some instances convictions were secured. Lately the cattle have again been causing trouble. Yesterday Inspectors Hughes and Simons made a trip up the river. They observed several cattle belonging to a man by the name of Carhart grazing in the bottom land near the river's edge. The inspectors watched the cattle until they secured direct evidence that the animals were poliuting the stream, and then returned to the city and swore out a warrant for the arrest of Carhart in Justice Austin's court. The inspectors are quite sure that they will secure a conviction this time, that will prove a wholesome example to those who own cattle that are pastured along the river.

HER HOME GOING TO KUIN.

A petition was filed at the County Clerk's office yesterday by B. F. Lewis, who is asking for letters of administration in the \$600 estate of airs. Martha M. Mootry. Mrs. Mootry is the poor little woman who died last September under very suspicious circumstances, from a revolver wound in the breast at her home on San Julian street near the corner of Twelfth. Rumor had it that she was deliberately murdered by her husband, Charles T. Mootry, who was tried on a charge of wife-murder and acquitted.

She owned the little home place where she and her husband were living at the time of her tragic passing. She left no will, as Iar as due search and inquiry can ascertain. Her husband, who is still hanging around Los Angeles, has, it is averred, persistently refused to apply for letters of administration in his deceased wife's estate, preferring rather to let the property run to ruin through lack of care and neglect. Petitioner states that the property is in bad shape, and he believes that he is entitled to be appointed administrator, although he is in either kith nor kin nor an heir to the estate in any way.

Mrs. Torrey son, M. E. Torrey, is omitted from any provision for him in her lifetime according to her circumstances. All her property is bequeathed to the daughter.

FOR FORECLOSURE. Ira Phillips is valing Juan Alexander Bernard and his wife to foreclose a 13000 mortgage.

DIVORCED. Mrs. M. Schillinger was divorced from Karl Schillinger by Judg Smith yesterday, do the ground that her husband had been convicted of a felony and is now in State's prison. Schillinger is doing four years in San quentin for burgiary. Chickens were his specialty.

Tomorrow is regulars quarterly pension day at the County Courthouse, and it is anticipated that no less than 1000 pensioners will apply with their vouchers at room 10 of the Clerk's office between the hours of 8 a.m. and 5 p.m. Preparations are being made for a great rush, although it would be better for all concerned if pensioners could only understand that they need not execute their vouchers on the 5th—the usual day, which is the 4th, falling on Sunday—but might do so any time thereafter, and get their returns more promptly, If pensioners would only spread the execution of their vouchers out over three days, instead of all rushing in on the first day, fewer—far fewer—clerical errors would be made, and less inconvenience occasioned to both man and women who must often stand for hours about the corridors and be jostied and jammed until the weariness of the fiesh becomes seemingly as great as the hardships of battle.

Cierical errors are no small element in the causes of delay in returns—and a comprisingly large number of mistakes are always made in the hub-bub of a tired, peevish crowd of veterans eager to get away.

One other important fact should be thoroughly understood by the pensioner, and that is relative to giving the postoffice address. A MEAGER FINE E. W. Lewis, guardian of the estate of Miriam Seaman, daughter of the late L. S. Seaman, at one time City Assessor, was fined \$5 by Judge Shaw yesterday for contempt of court in refusing to turn over certain articles of personal property, belonging to the girl, to her Illiaois guardian, the Chicago Title and Trust Company. Seaman died, many months ago at Palm Springs, leaving his daughter a gold watch, a plano and other valuable personal property. The girl is now furnished a home by her aunt, Mra. Anna M. Häll, in Chicago, and it seemed best that she have the advantage of the property left her. Lewis falled to obey the order of the court in this respect with satisfactory alsority and it cost him \$5.

RESIGNATIONS AND PROMOTIONS.
SOLDIERS' HOME. March 3.—(Regular Correspondence.) The following changes have taken place during the week: George Meyers, Co. H. Twenty-sixth Pennsylvanis Infantry, late in charge of temporary-at-post quarters, is promoted to captain of home Co. A, vice Chaffee, resigned; William H. Purviance, late lieutenant Co. I, Ninth Illinois Infantry, is appointed in charge of temporary-at-post quarters, vice Meyers, promoted captain. Miss Ethel McFarland of Downey is appointed nurse in the hospital, vice RESIGNATIONS AND PROMOTIONS. ber of mistakes are always made in the hub-bub of a tired, peevish crowd of veterans eager to get away.

Many letters must necessarily lie in the head offices of the agencies two or three days, where thousands of vouchers are executed on the same day, and pensioners in general might remember that haste delayed a day or two may be time and strength and patience actually saved.

The unusually large increase of callers at the Clerk's office tomorrow will be due to the fact that all pensioners who have heretofore been drawing through eastern agencies, have, by order of the Commissioner of Pensions, been transferred to the San Francisco, from which place she expects an early assignment to one of the contract of the commissioners who have heretofore been drawing through eastern agencies, have, by order of the Commissioner of Pensions, been transferred to the San Francisco agency, through which most veteran patients.

GOOD AS GOLD!

The most conservative business men are taking advantage of the opportunity to secure stock in the Puente Crude Oil Company at the present "ground floor" prices. It is a wellknown fact that the Puente Oil Field is the richest producing territory in California, and those who secure stock in this company now are assured of a rapid increase in value and handsome dividends in the near future. The financial backing of this company and its management being in charge of men of the highest integrity in the business world commends it to the most careful investor.

The Puente Crude Oil Company own 874 acres of Proven Oil Land.

This Company's property is the cream of the Puente Oil District, and is joined on the west by the land of the Puente Oil Company, who have upwards of 50 producing wells from which the net income during the past year was \$175,000. The oil strata on which these wells are located can be traced directly through our property and westwardly to the Whittier Oil Fields. Within one-quarter mile of our southern line are the wells of the Brea Canyon Oil Company, where the famous gusher is located. This well, when first struck, produced 1200 barrels a day, afterward evening down to 300 barrels a day, which amount it is producing at the present time. The Graham & Loftus 300-barrel flowing well lies threequarters of a mile to the east. The well-known Santa Fe wells lie to the southeast of us, and the Columbia oil wells lie in the same direction, The Union Oil Company are drilling wells one-half mile to the southwest, while other developments are being made to the north of us. With rich producing oil wells on all sides of us, and the most favorable geological formations there is no doubt but that big paying wells will be struck on this property. We own this land and have no royalty to pay. Title to the land is perfect.

MAP SHOWING LANDS OF THE PUENTE CRUDE OIL CO.

Note the relative position of our lands to those of the largest producing companies in California.

Development work is being pushed as rapidly as possible.

Before this company was incorporated one week nearly one hundred thousand shares were subscribed for without solicitation by parties living in the vicinity and familiar with this land.

An occasion that will be a memorable one in the business career of the firm of Jacoby Brothers was the opening yesterday of its new outfitting store on South Broadway, which is the largest satabilahment of the kind on the Pacific Coast. Not only is it the largest, but in the handsome four-story building which is entirely occupied by this firm, is carried the most complete assortment of men's, children's and women's garments in the West.

All day yesterday a large and admiring crowd attended the opening, and all day an excellent orchestra furnished music.

There are five floors in the new.

all day an excellent orchestra furnished music.

There are five floors in the new store, sach devoted to special lines, and all representing over \$0,000 square feet of space. One's attention is attracted before entering the building by the beautiful show windows, which are as the as any in the city. In laying out the store it has been one of the chief aims to secure plenty of light. Not only is every inch available used for his purpose both front and rear, but from the main floor to roof is a court from the main floor to roof is a court wenty-five feet by forty, which leaves tot a dark corner in the entire building. The decorations throughout are white, and oak, giving to the store a tchness of tone that is rarely found.

The lower floor is devoted to the shoe tepartment, occupying a space 175 feet by 75 feet. This is said to be the largest

"Nothing Succeeds Like Success."

The California Oil Comp

Advancing, step by step, on her road to success, is now drilling on her 1035 ACRES of Richest Oil Land of the San Fernando Petroleum Mining District.

The California Oil Company has a well demonstrated "cross strike," the only instance, so far as known, that exists in

the entire district, which is the oldest and best developed district in the State.

We are drilling on the same "strike" with the wells of the wealthlest oll company of the great west, and the surface in-

dications of our cross vein or "strike" point to larger and richer oil measures than in the strike already developed.

Immense oil stratas mean immense wealth. We challenge examination of our field and comparison with any other oil territory of California. The constant drop of the drill 24 hours each day in the richest oil field of California, assures our stockholders that the value of their stock will DOUBLE, TREBLE, and QUADRUPLE by the strike of a single well, and that the advance to many dollars per share will only be a question of more wells in our immensely rich territory.

Stock selling at 25 cents per share for \$1.00 shares but subject to advance without notice. Address,

OPELAND'S New Spring Suits and Costumes.

The women of Los Angeles are better informed in matters pertaining to the art of dress than those in any other city in America; more dressy in their tastes, and are, by far, more exacting in discriminating between what might be called the fairly well made garments and the real artistic kind-Cost and quality of material alone does not mean elegance in dress, but that style beauty that embodies graceful, perfect fitting garments of right proportion. That Copeland's garments fulfill all these requirements is due our phenomenal success. Customers that are considered over exacting by other stores are the first to be satisfied here. We have just what they want.

\$8.50 to \$25---New Spring Jackets—Light pretty jackets will be worn more generally this season than ever. The light dainty dress materials that will be worn during the summen make them all the more necessary. We are ready to show you all the handsopest coats of the season, plain tailor made and appliqued, many styles.

\$13.50 Swell New Eton Suits—100 New Cheviot Homespon Suits, blacks, grays, blues and in light spring shades Jackets silk lined and taffeta faced. lany men and women are afraid of death when they think of the approach of the grim reaper, or when a friend or relative is called away. Such people seem to forget, how-ever, that the length of time they may remain on earth rests, in most instances, entirely with themselves.

An ache or pain is a warning—a forerunner of an ail-ment that frequently leads to a bed of sickness or an un-timely death. Some are content to entrust their lives and health to the keeping of doctors who are not specialists, but who offer some new life giving, or life sustaining (?) fad. Still others pin their faith to and squander their money on patent medicines or electric belts.

if you are not strong and well, if you have a warning symptom of an approaching ailment, or a chronic disease of any nature, at any stage, you can find quick relief and a permanent cure at that old reliable medical institution, The English and German Physicians.

STAFF OF THE ENGLISH AND GERMAN PHYSICIANS.

These specialists are making more cures annually than all the other doctors in California. Their list of patients increases month by month and year by year. They are well-known throughout the West for thousands of cures.

While the English and German, Physicians administer the best and most expensive remedies that money can buy, and give the best and most skilled services, their terms and prices are reasonable alike to rich and poor.

They have a special and successfully conducted department for diseases and weakness of women, where all female complaints are cured.

The Home Cure system of the English and German Physicians has long been a success. By its marvelous workings patients are cured at any distance. Sufferers who cannot come to Los Angeles should write for private book (for either men or women), question list, diagnosis sheets advice, prices, etc., all free.

ine Furniture... The Los Angeles and Cape Nom Mining Company.

A New Gold Mining Company organized in this city with an abundance of capital; a world force of experienced men; a splendid plan, and 18 rich claims at Cape Nome, 8 of which are within ten miles of Nome City.

absolutely safeguard the interests of its stockholders. Los Angeles may be congratulated on being the home of such an orga tises to yield such handsome returns to all who are so fortunate as to secure an interest in its many valuable gold claims at Cape N

A history of the experiences of the men who are most largely interested in the company would form one of the most fascinating Alaskan adventure; an experience extending over a period of two years, and an extent of country measured only by thousands of miles. Mr. Marple, the president of the company. has for several years been a resident of Los Angeles, coming here from Aberdeen, S.D., where for many he was in the banking business, as president of the Northwestern National Bank. He thus brings to the head and management of the co wide and ripened business experience, aside from that which he acquired in Alaska, where he went in January, 1808, as one of a party of organized in Los Angeles. The party went into the Copper River country over the terrible Valdes pass and glacier. After losing all of the supplies through the treachery and desertion of one of the party, and enduring every privation, facing innumerable dangers, risking to

my occasions, and, in the end, overcoming every obstacle, even in the face of starvation, they reached Weare, on the Yukon, in the fall of Thus far the party had seen no gold and the prospect of ever seeing any was growing less as each of the many prospecting trips up down the Yukon proved fruitless. At Weare the party met the several members of the Scarberry-Taylor party who had an experience livaried, dangerous and romantic than their own. They had entered Alaska by the route over the White Pass and down the Yukon, who nearly perished in the White Horse and Five Finger rapids, and some of them finally reaching Weare by the difficult routes through the mile and Tanana countries. They, too, had experienced nearly every privation and danger incident to Alaskan experiences; and they, too

Mr. Geo. W. Scarberry, who has been chosen as the Vice President of the Company, was one of that party. He was from Des Moines, here for some years he was prominent in municipal and State politics.

In March, 1899, the now associated parties started for Cape Nome, news of that wonderful new field having reached them earlier in Their route lay over nearly 700 miles of storm-swept valleys, mountains and frozen seas, and in the face of an Arctic midwinter. But the bag of gold lay at the end of the bow their hopes had painted, and they struggled on to the end where they, indeed, found it.

Arriving at Nome on May 1st, they lost no time in prospecting nearly every creek in the Nome and Bonanza districts. They thus secured

Since returning to the States the parties have in part divided their interests, but the Los Angeles and Cape Nome Mining Company has seeded not only to the 18 claims which are a pick of the 63 located, but also to the best and most competent members of the original parties. have a body of picked and experienced men organized as a company to work the selected claims and to acquire others of proven value. The operations of the company will be in the charge of six men of the original party of thirteen, who will combine with their busin

edge, the experience gained by two years of Alaskan life, of which one season was spent at Nome. The other members of the have had no Alaskan experience, will all be men of proven worth and integrity, and skilled in their several capacities. The Company will take all necessary tools and machinery for the systematic development of its properties. With its extended ngs it will combine an extensive and practical business through the medium of an office to be built and permanently maintained at Nom This office will be in charge of Mr. W. P. Butler, the Secretary and Treasurer of the Company. Mr. Butler resides in Minneapolis, where for se

years he was actuary and financial manager for a Savings Association and subsequently General Agent for the Fidelity Mutual Life Ins Company. Being a civil and mining engineer as well, and a deputy U. S. mineral surveyor, he will be enabled to render the Company va services in those special and technical lines as we'l as in his capacity of financial manager. This new company is thus founded not on a mere prospect, or the hope of one, but on a large and valuable property alrea not founded as a "wild cat" stock-selling scheme, but as a substantial and conservative business enterprise. It is not in the hands of inexp

enged men who have their experience to get, but in the hands of men who have already acquired their experience on the ground to be worked. in the hardest of schools. The integrity of the organizers is best demonstrated by the manner in which they have organizers nade it free from all the speculative features which cause the conservative investors to shun many mining companie The company, which is incorporated with an authorized capital stock of \$500,000, will issue 100,000 shares, of which 75,000 shares. the acquirement of the properties of the Company, and 23,000 shares will be offered for sale at par. An additional 100,000 shares of stock will

placed at the disposal of the board of directors, to be used in the acquirement of further properties. Not a cent of the income derived from

ale of the 25,000 shares of stock placed on the market will go to the incorporators, but all of it will constitute the working fund of the Company. The fact that the stock of the Company is to be sold in limited quantity and at par, instead of in vast quantities and at 5 or 10 cents there, as is usually done. The fact that all of the money realized from the sale of stock will go into the development and extension of the or erty, i stead of into the pockets of the organizers, as is usually done. The fact that the promotors are experienced, conservative and tried; they know from experience nearly every mile of the district, its history and needs, and the owners and locators of the best claims, instead of b nexperienced enthusiasts. The fact that they already have a large lot of selected claims upon which to begin operations, instead of having to be or properties in competition with thousands of others. The fact that they will go with a fully matured plan of operations, and with men noney to carry out that plan, instead of going single handed, and trusting to luck to find favorable conditions awaiting them.

All of these facts combine to make the enterprise especially inviting, and the stock of the Company especially desirable as an luch of the stock has already been taken by Los Angeles people and all of it could be placed here within a few days were it not that mu poken for by persons in Minneapolis and Chicago. How much more of the stock will be placed here can be learned by referring to Mr. H. larple, President, at the office of the Company, 2.5 Homer Laughlin Building.

Fortunes will be made out of the fabulously rich Nome district during this and the next few years; and we k ong the fortunate ones than those who will be interested in the Los Angeles and Cape Nome Mining Company. The accompanying maps, prepared by the Secretary of the Company, show the location of the Company's claim

SHARES AND MONEY.

A. P. NIGHT REPORT.]

NEW YORK, March 2.—The feature of the stock market was the disturbed condition of mind manifested by the bears whose demands for stock to cover short contracts worked some violent recoveries in the industrial and specialty departments of the market. This influence was first evident in Third Avenue, which bounded up eight points on the belief that financial assistance had been secured to rehabilitate the property. The short account in Sugar again gave signs of being overextended, and after failing to near \$5, the quotation touched 101% in the late dealings. A decline in bid price of raw sugars, thus widening the gap between the cost of raw and refined sugars, was an influence. The movement in these stocks had a sympathetic influence upon other industrials, and there were general recoveries from the opening weakness during the first hour. A period of duliness and heaviness succeeded while waiting for the hank statement, and upon the publication of that statement the market displayed increasing animation and strength until the close, which was generally at the top and net gains in nearly all stocks. Part of the buying was on the principle that when had news is out a raily is due. But the return was in fact not so weak as hadbeen feared. Receipts of cash from the intesior were larger than anticipated, and the loss in cash correspondingly less. Another loan expansion so formidable as 39,821,000 was apparently viewed with complacency, as the feeling has grown up in Wall street that much of the recent loan expansion will find a quick return to the money market. So long as call loans are made at 2 to 2½ per cent. there will be no acute alarm over the money market prospects.

The stock market this week has ben torn by the conflicting influences SHARES AND MONEY.

KINDLY TO IT.

The Rate is Thought to Be Exerbit as Compared With That Usu-Charged, and the General Name

Several days ago The Times published a general outline of a scheme concered by C. P. Huntington by which a mutual insurance company was to be formed for the benefit of imployes of the Southern Pacific.

Those now in the employ of the ampany were to be admitted without my medical examination or reference o age, provided they take advantage of this privilege within one year. But he present employes are not to be empelled to join the organization.

All applicants for employment after farch 1, 1800, will be required to join he association willy nilly.

Home ten days ago large posters setting forth the details of the scheme yere received here and put up in conclusions and them. These were carefully samed and when it was learned that order to reap the benefits of Mr. untington's benevolence a man has easy 90 cents per month for each 60 of insurance, the kicking began is it at the rate of \$3.50 per month, \$18.50 per year for each \$1000 of life surance carried. This insurance carried. This insurance carried to the boys now pay 50 cents per onth, and a small sick benefit, 50 sta per day after the first week's shilly to work. In case of accintal death the insurance is doubled, other words, if an employé carries 60 life insurance, which sum would paid in case of matural death, should leas his life accidentally in the disarge of his duties for the railroad, would set \$3000.

But in spite of all this the boys and the scheme as a regular cinch, he policies and other necessary tionery to put the scheme in operan are not here yet, so no practical t can be made of it. But out of a more of employed interviewed, every asid he would not go into the existion unless compelled to do so.

coupled with it.

One man said: "I belong to the Maccabees Society. I have \$3000 insurance in that body. It costs me ealy \$3 per month, or \$1 per \$1500 insurance carried. I went in when I was not so young as some. Others have insurance in the order which costs them less than \$19 per \$1000 per year. Other societies are nearly as cheap. How is that compared with \$31.20 per \$1000 per year? Do you wonder we are not sitting up nights waiting for those blanks to get here?"

Another said: "No. I do not take to the scheme. None of us do. Every man who has spoken to me about it are also that it is a cinch. We are taken books in the regular insurance companies and looked up the rates i our ages and we can buy insurance heaper in the regular companies.

DOGTOWN PLEASANTRIES.

L. CARANZA'S EXPERIENCE COST
HIM TEN DOLLARS.

L. CARANS paid \$10 in the Police
Court yesterday for getting into
trouble with Martin Schrenser in dogtown, when he went home at 2 o'clock
in the morning. When sent in by
Officer Lehnhausen, Caransa had blood
on his head, and Schrenser, who appeared at the Police Station shortly
afterward for medical treatment, had
blood on his right arm, which had
flowed from a small scratch at the elbow, which he said Caransa had inflicted with a knife.

In explaining matters to Justice Austin yesterday afternoon, Caransa said
that when he went home from work
he found Schrenser, in his wife's room,
which naturally aroused his ire. He
was not very clear on what followed,
escipt that Schrenser struck him on
the head with a club, and when he
blew a police whielle for assistance he
was run is.

Schrenser's testimony was to the effect that he was not in the room of
the woman who lives with Caransa.
The latter, accompanied by another
man, had a dispute with the woman,
and she went to his room for pretection. Caransa followed, fore the
woman's clothes and cut him on the
arm with a knife. The court found
Caransa guilty of disturbing the peace,
and a friend went out and got the
money to pay his fine.

rested yesterday on charges of battery.

The two men, who are roustabouts for the Nadeau Café, work in the basement. Fisher was gathering up junk yesterday forencon, and had deposited a sack of bottles on the stairway while he went to attend to some other business. On his return the bottles were gone, and 'Sullivan, in a spirit of mischief, he says, told Fisher that he had seen a man walking off with them.

Fisher started in hot haste after his bottles, but soon returned and found them behind a door. Hot words then passed between him and Martin, which resulted in the latter striking the junk dealer with a stick of wood. Fisher called for assistance, and Officer Fifield arrested both Martin and Sullivan. Martin was found guilty, and fined \$10, and Sullivan was discharged.
